*In systems running 2.5 or older software, the second level of DNs were the B2 DNs.

B2 DNs

For systems set to partial double density PDD, B2 channels on DS30 bus 06 and 07 can be used for such applications as Companion handsets, ISDN device B2 requirements, and Call Center applications. If your system is set with a 3/5 DS30 split, only the B2s on DS30 bus 06 are available.

DS30 BUS 06 B2s

Port	Default DN		New DN	Device/ Application

Button Programming

Telephone DN records, part 4

Line assignment: You can only assign a maximum of 93 appearances for any line.

M7000/T7000: 4 buttons (01-04) without indicators

M7100(N)/T7100: 1 button (01)

M7208(N)/T7208: 8 buttons (01-08)

M7310(N): 34 buttons - 12 with indicators, 12 main level, 12 upper level

M7324(N): 24 buttons

T7316: 24 buttons - 16 with indicators (refer to button number charts)

T7316E: 24 buttons - 16 with indicators (refer to button number charts)

T7406: 6 buttons, numbered 01-03 and 07-09

i2004: 12 programmable buttons

i2002: 9 programmable buttons

NetVision handset: 10 programmable spots, 8 for SWCA and 2 for intercom

Key Indicator Module (KIM) for T7316E: 24 buttons with indicators

Central Answering Position module (CAP) for M7324(N): 48 buttons with indicators
